

Aquarius in the Aquarian age

February Aquarians, in particular, are visionaries brought into this world to lead with integrity, and instigate change. February Aquarians secretly desire warm, affectionate relationships that stoke the soft romantic heart hidden under their cool exterior. We become tough through the life experience, through endurance, commitment and heartache, and this is where Saturn's influence comes in.

Saturn is the Taskmaster of the zodiac. as be tough enough to bear the suffering weight of the world in our hearts while our soul is driven with a desire to lift yours, this is where the quirk comes in.

Aquarius is also ruled by Uranus, the planet of lightning bolt epiphanies that grasp broad humanitarian concepts, that can inspire others. Through flashes of illuminating inspiration, Aquarius cuts through the patriarchal shroud.

We naturally battle against the grain, not because we do not wish to be part of society, but because we do not waste our energy on things which serve no authentic purpose. No matter how bad things seem or get, the Aquarius visionaries Uranus has infused extra strong intuition into can raise everyone up with but a few wise words.

But here's the thing. The gift of intuition is overlaid with layers. Personality, and character, family structure and culture, and an analytic, strategic, curious mind, thanks to Uranus.

Aquarius has an in-built sensory monitor that picks up, reads, understands, and then acts upon what energy reveals. A sixth sense that allows for a deeper understanding of the world at large.

The Aquarian age energy has already blossomed, (the feminine) and has burst the fragile bubble (the masculine), that has pulled the illusive wool over humanities eyes and bulldozed and bludgeoned its way across the globe, realistically and figuratively speaking through religion, politics, and private enterprise, and for what?

To retain control. To have THINGS rather than truth. To amass more money than one can spend in ten lifetimes. To suit a dreadful purpose to turn people into commodities for economic growth, while the true meaning of life passes them by.

As the greedy, grasping, gripping claws of the masculine sink deep into our present, we must push back against everything the Patriarchal Piscean age has wrought upon us. We must undo, unravel, and expose all the lies, all the abuse, and remove what is harmful to humanity.

This means taking action that might seem small and insignificant at first, but it is a first step towards a brighter, fairer future for all women and children.

In *The Spiritual Third Way* book, you will discover how to do this in unique ways, tailored to suit, challenge, and support you on your individual journey. Your spiritual journey...

February is seen as the quirky month of the zodiac since it only has 28 days, and carries the leap year day every four years. But did you know that before the unnaturally aligned 12-month sun calendar coerced the entire planet, driving out the natural way of nature's divine, fully calculated alignment to a matriarchal form of societal evolution, the Dream spell calendar was used in communities and tribes around the world. This is a calendar of 13 equal months of 28 days based around the moon's cycle. This allows one to chart the course of time using seasonal change, astrological alignments, animal migration and other natural occurrences.

I often wonder what sort of world it would have been had those interfering, self-serving beasts in Europe had not coerced and convinced the world into adopting their criminal, discriminatory structures based around tax and profit, which crippled the world's natural evolution towards a Matriarchy.

I am not bitter about this, since I am one of the Aquarian women who is meant to be here in THIS time, to gather the power and strength of women, and then use it wisely.
